µClouds SE

µClouds SE

µClouds SE is a granular audio processor that creates textures and soundscapes by combining multiple segments of sound taken from a recording buffer.

This re-engineered Eurorack module updates and simplifies the classic **Mutable Instruments Clouds** design by miniaturizing the module from 18HP to 8HP and redesigning the front panel layout without eliminating any original functionality.

Fully compatible with upstream Clouds firmware. Includes power cable, mounting hardware, and a one-year warranty. Designed and built with care by **Tall Dog Electronics** in Western Massachusetts. Licensed **CC BY-SA 4.0** open source hardware.

Part number	Panel style	Panel material
TD-UCSE-C/B	Matte black, gold markings	Copper clad laminate
TD-UCSE-C/S	Satin silver, black markings	Anodized aluminum

Height	**3U** (128.5 mm)	
Width	**8HP** (40.3 mm)	
Depth	**43 mm** (with power)	
+12V	**120 mA** (average)	
−12V	**10 mA** (average)
